^o The annual expense ratio is based on expenses incurred by the fund, as stated in the most recent prospectus.

Growth of \$10,000 Since Inception

Results shown are since 08/31/1993. This chart illustrates a hypothetical \$10,000 investment in Class A Shares without the effect of sales charges and assumes all distributions have been reinvested and if sales charge was included values would be lower.

The performance data quoted herein represents past performance and does not guarantee future results. Market volatility can dramatically impact the fund's short-term performance. Current performance and expense ratios may differ from figures shown. For performance data current to the most recent month end, please call First Eagle Funds at 800.334.2143 or visit us at www.feim.com. The average annual returns are historical and reflect changes in share price, reinvested dividends and are net of expenses. "With sales charge" performance for Class A Shares gives effect to the deduction of the maximum sales charge of 3.75% for periods prior to March 1, 2000, and of 5.00% thereafter. The average annual returns for Class C Shares reflect a CDSC (contingent deferred sales charge) of 1.00% in the year-to-date and first year only. Class I Shares require \$1MM minimum investment and are offered without sales charge. Class R6 Shares are offered without sales charge. Operating expenses reflect the Fund's total annual operating expenses for the share class as of the Fund's most current prospectus, including management fees and other expenses.

1. Beta is a measure of the fund's volatility (risk) relative to the overall market. The higher the fund's Beta, the more the fund price is expected to change in response to a given change in the value of the market.

2. Standard deviation is a statistical measure of how returns over time have varied from the mean. A lower number signifies lower volatility.

3. ©2021 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. First Eagle Gold Fund Morningstar ratings - A Shares: Equity Precious Metals Category; Three-year rating: 4 stars/61 funds. Five-year rating: 4 stars/59 funds. Ten-year rating: 5 stars/50 funds. Different share classes may have different ratings.

Total as % of Net Assets		65.9	

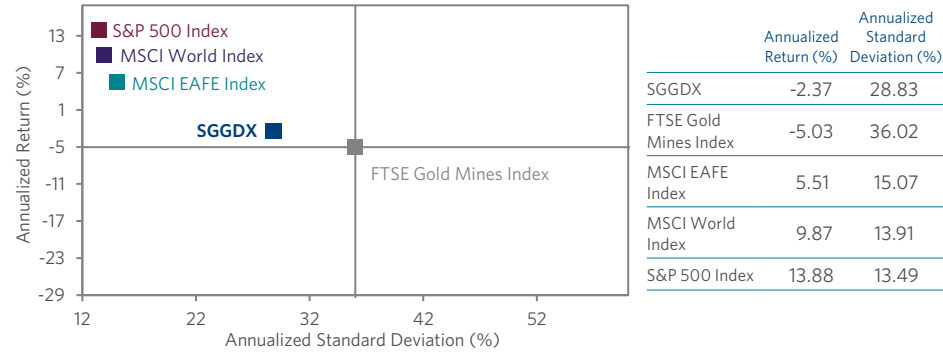

4. Portfolio holdings are subject to change and should not be considered a recommendation to buy or sell securities. Current and future portfolio holdings are subject to risk.

The Fund invests in gold and precious metals through investment in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). Gold Bullion and Commodities include the Fund's investment in the Subsidiary.

Allocation By Asset Class (%)⁶

10 Year Risk vs. Return⁵

Results shown are since 12/31/2010. This chart illustrates risk and return data for Class A Shares without the effect of sales charges and assumes all distributions have been reinvested and if sales charge was included values would be lower.

5. The MSCI World Index is a widely followed, unmanaged group of stocks from 23 developed market countries and is not available for purchase. The index provides total returns in U.S. dollars with net dividends reinvested. One cannot invest directly in an index. The Standard & Poor's 500 Index is a widely recognized unmanaged index including a representative sample of 500 leading companies in leading sectors of the U.S. economy and is not available for purchase. Although the Standard & Poor's 500 Index focuses on the large-cap segment of the market, with approximately 80% coverage of U.S. equities, it is also considered a proxy for the total market. The Standard & Poor's 500 Index includes dividends reinvested. One cannot invest directly in an index.

*1993 performance is for the period 08/31/1993 to 12/31/1993.

Performance information is for Class A Shares without the effect of sales charges and assumes all distributions have been reinvested and if sales charge was included values would be lower. Past performance does not guarantee future results.

Funds whose investments are concentrated in a specific industry or sector may be subject to a higher degree of risk than funds whose investments are diversified and may not be suitable for all investors. Investment in gold and gold related investments present certain risks, including political and economic risks affecting the price of gold and other precious metals like changes in U.S. or foreign tax, currency or mining laws, increased environmental costs, international monetary and political policies, economic conditions within an individual country, trade imbalances and trade or currency restrictions between countries. The price of gold, in turn, is likely to affect the market prices of securities of companies mining or processing gold, and accordingly, the value of investments in such securities may also be affected. Gold related investments as a group have not performed as well as the stock market in general during periods when the U.S. dollar is strong, inflation is low and general economic conditions are stable. In addition, returns on gold related investments have traditionally been more volatile than investments in broader equity or debt markets. Investment in gold and gold related investments may be speculative and may be subject to greater price volatility than investments in other assets and types of companies.

There are risks associated with investing in securities of foreign countries, such as erratic market conditions, economic and political instability and fluctuations in currency exchange rates. These risks may be more pronounced with respect to investments in emerging markets.

The FTSE Gold Mines Index Series is designed to reflect the performance of the worldwide market in the shares of companies whose principal activity is the mining of gold. The FTSE Gold Mines Index encompasses all gold mining companies that have a sustainable, attributable gold production of at least 300,000 ounces a year and that derive 51% or more of their revenue from mined gold. The Index is unmanaged, is available with dividends reinvested and is not available for purchase.

FEF Distributors, LLC ("FEFD") distributes First Eagle products; it does not provide services to investors. As such, when FEFD presents a strategy or product to an investor, FEFD and its representatives do not determine whether the investment is in the best interests of, or is suitable for, the investor. Investors should exercise their own judgment and/or consult with a financial professional prior to investing in any First Eagle strategy or product.

Investors should consider investment objectives, risks, charges and expenses carefully before investing.
