Morningstar Rankings—I Shares

Morningstar Category: Equity Precious Metals

Return Period	Category		
	Percent	Rank	# of Funds
1 Year	58%	44	70
3 Years	92%	60	67
5 years	38%	28	65
10 Years	39%	18	47

The Morningstar and Lipper Rankings are for Class I and based on total returns; other classes may have different performance characteristics.

The Fund invests in gold and precious metals through investment in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). Gold Bullion and Commodities include the Fund's investment in the Subsidiary.

*For the period May 31, 2014 - October 31, 2014, the stated percentage of total net assets invested in gold bullion included an allocation to silver bullion. During that time the allocation to silver bullion was less than 3%.

The performance data quoted herein represents past performance and does not guarantee future results. Market volatility can dramatically impact the fund's short term performance. Current performance may be lower or higher than figures shown. The investment return and principal value will fluctuate so that an investor's shares, when redeemed may be worth more or less than their original cost. Past performance data through the most recent month end is available at www.feim.com or by calling 800.334.2143. The average annual returns for Class A Shares "with sales charge" of First Eagle Gold Fund give effect to the deduction of the maximum sales charge of 5.00%.

* The annual expense ratio is based on expenses incurred by the fund, as stated in the most recent prospectus.

There are risks associated with investing in securities of foreign countries, such as erratic market conditions, economic and political instability and fluctuations in currency exchange rates. These risks may be more pronounced with respect to investments in emerging markets.

Funds whose investments are concentrated in a specific industry or sector may be subject to a higher degree of risk than funds whose investments are diversified and may not be suitable for all investors.

Investment in gold and gold related investments present certain risks, including political and economic risks affecting the price of gold and other precious metals like changes in U.S. or foreign tax, currency or mining laws, increased environmental costs, international monetary and political policies, economic conditions within an individual country, trade imbalances and trade or currency restrictions between countries. The price of gold, in turn, is likely to affect the market prices of securities of companies mining or processing gold, and accordingly, the value of investments in such securities may also be affected. Gold-related investments as a group have not performed as well as the stock market in general during periods when the U.S. dollar is strong, inflation is low and general economic conditions are stable. In addition, returns on gold related investments have traditionally been more volatile than investments in broader equity or debt markets.

The FTSE Gold Mines Index Series is designed to reflect the performance of the worldwide market in the shares of companies whose principal activity is the mining of gold. The FTSE Gold Mines Index encompasses all gold mining companies that have a sustainable, attributable gold production of at least 300,000 ounces a year and that derive 51% or more of their revenue from mined gold. The Index is unmanaged, is available with dividends reinvested and is not available for purchase.

Standard Deviation is a statistical measure of a security's volatility, or variability in expected return.

Beta is a security's volatility relative to the market as a whole. As such, it measures the fund's market risk.

NAV (Net Asset Value) is the month ending price for the various share classes indicated.

2018 Morningstar, Inc.© All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. First Eagle Gold Fund Class I: The Morningstar percentile ranking for the First Eagle Gold Fund was derived using the total return of the performance figure associated with its 1-, 3-, 5- and 10-year periods, as of 11/30/18. Morningstar percentile rankings were: 58% for the 1-year (44/70), 92% for the 3-year (60/67), 38% for the 5-year (28/65), and 39% for the 10-year (18/47) periods when compared against the Morningstar Equity Precious Metals category.

Lipper, a wholly owned subsidiary of Reuters, is a leading global provider of mutual fund information and analysis to fund companies, financial intermediaries, and media organizations. First Eagle Gold Fund Class I: Lipper percentile rankings were (44/69) for the 1-year, (57/65) for the 3-year, (27/62) for the 5-year, and (17/46) for the 10-year periods ended 11/30/18 when compared against the Lipper Precious Metals Equity Funds classification.
