

First Eagle Overseas Fund

As of September 30, 2018

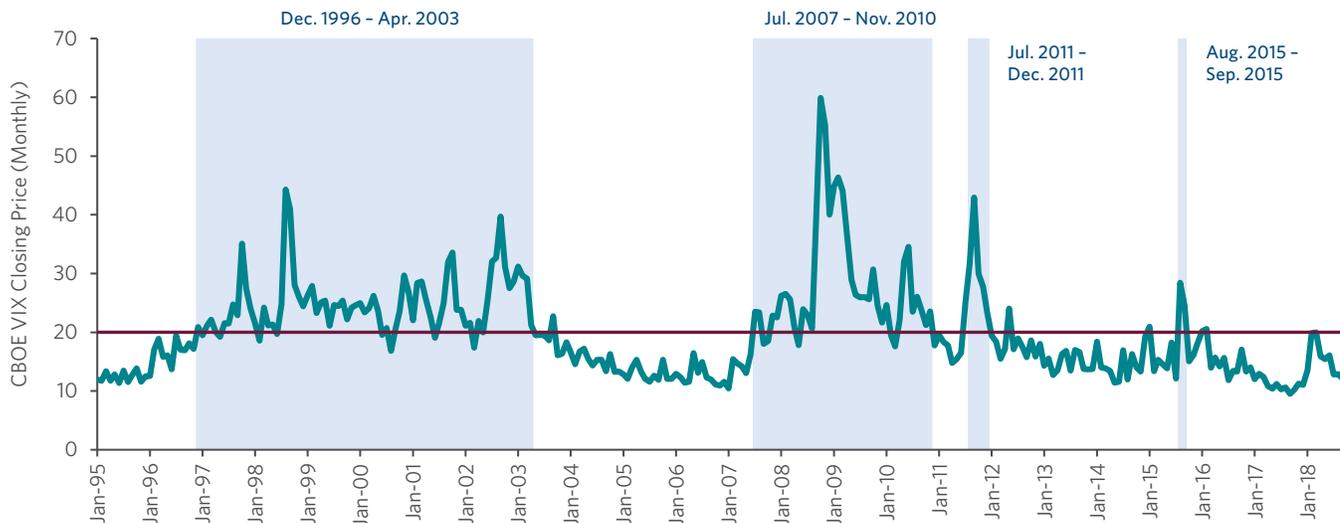

Volatility Is Our Friend

Many market professionals equate market volatility with risk. We disagree. We think the most serious investment risk is not the short-term waxing and waning of a portfolio, but the possibility of permanent impairment of capital. We seek to minimize this risk by investing in securities that we believe are trading at a discount to our estimate of their intrinsic value. We try to identify quality businesses through bottom-up research, develop our estimate of their intrinsic value, and purchase their shares only when they are available at a price substantially below our estimate of their intrinsic value. Volatility often makes this easier to accomplish.

Our funds may lag in runaway bull markets, but they have historically outperformed the benchmark during certain periods of increased volatility.

First Eagle Overseas Fund (A Shares w/out sales charge) during periods of increased volatility

The performance data quoted herein represents past performance and does not guarantee future results. Market volatility can dramatically impact the fund's short-term performance. Current performance may be lower or higher than figures shown. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Past performance data through the most recent month end is available at feim.com or by calling 800.334.2143. If sales charge was included returns would be lower.

Average Annual Returns as of 09/30/2018 (%)

				YTD	1 Year	5 Years	10 Years	Expense Ratio*
First Eagle Overseas Fund	Class A	without sales charge	SGOVX	-2.96	-1.07	4.01	6.63	1.15
		with sales charge	SGOVX	-7.81	-6.02	2.95	6.09	
MSCI EAFE Index				-1.43	2.74	4.42	5.38	

The performance data quoted herein represents past performance and does not guarantee future results. Market volatility can dramatically impact the fund's short-term performance. Current performance may be lower or higher than figures shown. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Past performance data through the most recent month end is available at feim.com or by calling 800.334.2143. The average annual returns for Class A Shares "with sales charge" of First Eagle Overseas Fund give effect to the deduction of the maximum sales charge of 5.00%.

*The annual expense ratio is based on expenses incurred by the fund, as stated in the most recent prospectus.

There are risks associated with investing in securities of foreign countries, such as erratic market conditions, economic and political instability and fluctuations in currency exchange rates. These risks may be more pronounced with respect to investments in emerging markets.

Investment in gold and gold related investments present certain risks and returns on gold related investments have traditionally been more volatile than investments in broader equity or debt markets.

The principal risk of investing in value stocks is that the price of the security may not approach its anticipated value or may decline in value.

The CBOE Volatility Index (VIX) is an unmanaged index, which shows the market's expectation of 30-day volatility. It is constructed using the implied volatilities of a wide range of S&P 500 index options. One cannot invest directly in an index.

The MSCI EAFE Index is an unmanaged total return index, reported in U.S. dollars, based on share prices and reinvested net dividends of approximately 1,100 companies from 21 developed market countries. One cannot invest directly in an index.

Morningstar Foreign Large Blend portfolios invest in a variety of big international stocks. Most of these portfolios divide their assets among a dozen or more developed markets, including Japan, Britain, France, and Germany. These portfolios primarily invest in stocks that have market caps in the top 70% of each economically integrated market (such as Europe or Asian ex-Japan). The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios typically will have less than 20% of assets in U.S. stocks.

Investors should consider investment objectives, risks, charges and expenses carefully before investing. The prospectus and summary prospectus contain this and other information about the Funds and may be obtained by asking your financial adviser, visiting our website at www.feim.com or calling us at 800.334.2143. Please read our prospectus carefully before investing. Investments are not FDIC insured or bank guaranteed, and may lose value.
