* The annual expense ratio is based on expenses incurred by the fund, as stated in the most recent prospectus.

There are risks associated with investing in securities of foreign countries, such as erratic market conditions, economic and political instability and fluctuations in currency exchange rates. These risks may be more pronounced with respect to investments in emerging markets.

Investment in gold and gold related investments present certain risks, and returns on gold related investments have traditionally been more volatile than investments in broader equity or debt markets.

The principal risk of investing in value stocks is that the price of the security may not approach its anticipated value or may decline in price.

All investments involve the risk of loss.

Standard Deviation is a statistical measure of how returns over time have varied from the mean. A lower number signifies lower volatility.

R-Squared reflects the percentage of a fund’s movements that is explained by movements in its benchmark index, showing the degree of correlation between the fund and the benchmark.

Beta is a measure of the fund’s volatility (risk) relative to the overall market. The higher the fund’s Beta, the more the fund price is expected to change in response to a given change in the value of the market.

Alpha is a measure of a fund’s excess return relative to the return of the benchmark index.

Information Ratio evaluates the ratio of the fund’s returns above those of a benchmark against the volatility of those returns.

Upside capture measures a Fund’s performance in up markets relative to the benchmark.

Downside capture measures a Fund’s performance in down markets relative to the benchmark. A down market is defined as those periods in which the market return is less than 0.

The MSCI World Index is a widely followed, unmanaged group of stocks from 23 developed market countries and is not available for purchase. The index provides total returns in U.S. dollars with net dividends reinvested. One cannot invest directly in an index.
